

Warning and cordon equipment

Description

This is a complete set of equipment that contains everything needed to be able to block off hazardous areas, warn people and avoid accidents. The kit is intended to be spread quickly to all areas affected by mines and shelling. It contains all the necessary tools, cordon equipment and warning equipment in Ukrainian, all packaged in a customized carrying system. Consumables can be easily refilled. The equipment is designed according to both Ukrainian and UN demining standards and thereby prepared for international support with demining.
